

Raka Ramadhani Aulia Prasetyo

SENIOR SOFTWARE ENGINEER

raprast.raka@gmail.com • (+62) 8199-6255-555 • raprast.asia • github.com/raka-raprast • linkedin.com/in/raka-raprast

Senior Software Engineer with an electrical-engineering foundation and 5+ years building products end to end across a wide range of businesses. I have shipped payment and card infrastructure in fintech, digital claims and policies in insurtech, on-chain FX settlement in Web3, an experiences marketplace in travel-tech, and platforms in dating, professional networking and AI. I enjoy owning a product from its infrastructure to the interfaces people touch, translating real business problems into reliable systems. Now pursuing a Master's in Electrical Engineering to bridge hardware, IoT and polished digital experiences, I bring a pragmatic, systems-oriented approach and a relentless drive to keep learning.

EDUCATION

Jakarta Global University — <i>Master of Electrical Engineering</i>	Aug 2026
Balikpapan University — <i>Bachelor's Degree, Electrical Engineering</i> Balikpapan, Kalimantan Timur GPA 3.50 / 4.00 Coursework: Programming & Algorithms, Database Design & Programming	Jul 2025
State Polytechnic of Balikpapan — <i>Associate's Degree, Electrical Engineering</i> GPA 3.56 / 4.00 Co-Founder, Poltekba Technology & Developer Club Coursework: Application Programming, Microcontroller	Sep 2020

WORK EXPERIENCE

VentureSEA — <i>Software Engineer</i>	Apr 2026 — Present
- Build an Indonesian insurtech platform making insurance accessible and transparent across gadget-protection, personal-accident, cyber and student plans. - Deliver fast digital-claims flows, 24/7 support features and integrations with major insurers to streamline the end-to-end policy and claims experience.	
Alpha Red Solutions — <i>Backend Engineer</i>	Jan 2026 — Present
- Engineer backend orchestration for GrandeConnect, middleware connecting airline, hotel and travel-agency apps to GDS/NDC networks, airline hosts and payment gateways. - Develop NestJS, ElysiaJS and .NET services over MySQL and Redis powering real-time connectivity across the Grande product suite.	
YouApp — <i>Senior Software Engineer</i>	Jun 2024 — Present
- Developed and maintained mobile apps (Flutter), web applications (Next.js) and backend systems (NestJS, Golang) across projects, using MongoDB and PostgreSQL for data persistence. - Mentored and guided junior developers by establishing and enforcing coding standards and project structures across these diverse technology stacks. - Collaborated with team leads to communicate tasks and technical direction across Flutter, Next.js, NestJS, Golang, MongoDB and PostgreSQL.	
HeartFull — <i>Team Lead</i>	Jun 2025 — Oct 2025
- Led the team building a merit-based dating platform where character is the currency, with no paywalls. - Owned product delivery end to end, coordinating engineering and design toward a coherent, ship-ready experience.	
Qwork — <i>Mobile Application Developer</i>	Oct 2023 — Jun 2024
- Implemented efficient state management and data fetching with TanStack Query in React Native applications. - Wrote high-quality, cross-platform React Native code, reducing development time while keeping functionality and design consistent across iOS and Android. - Partnered with UX/UI designers to translate wireframes into functional screens and integrated REST/GraphQL APIs with backend developers.	
Pikpo — <i>Full Stack Engineer</i>	Oct 2021 — Jun 2024
- Developed and integrated 5+ core features using Flutter for cross-platform front-end and Golang (Gin Gonic) for high-performance backend services and APIs, backed by PostgreSQL. - Ensured application quality and stability with robust unit and integration testing across the Flutter/Golang stack, cutting production bugs by 30%. - Designed and integrated 3 AI-driven features via FastAPI microservices, enhancing capabilities and user engagement.	
JasaPedia — <i>Mobile Developer</i>	Jul 2022 — Aug 2022
- Designed and developed 4 high-performance, offline-first mobile apps using Flutter with SQLite for secure local data management. - Helped clients identify business challenges and delivered tailored offline solutions, boosting operational efficiency in low-connectivity areas. - Coordinated and presented weekly progress reports to the CEO for transparent alignment on goals, timelines and deliverables.	
Unicorn Four Season Durian — <i>Flutter Developer</i>	Oct 2020 — Dec 2020
- Wrote structured, readable, maintainable Flutter code following best practices in widget structure and state management. - Consumed RESTful APIs to implement dynamic front-end features with efficient data handling and a smooth user experience. - Assisted in system architecture design, contributing scalable solutions aligned with business objectives.	

SKILLS

Programming Languages: Dart (5 yrs), TypeScript (3 yrs), Python (5 yrs), Go (3 yrs)
Mobile: Flutter (5 yrs), React Native (1 yr)
Web: ReactJS (3 yrs), NextJS (2 yrs), Web3
Backend: NestJS (2 yrs), FastAPI (5 yrs), Django (1 yr), Gin (3 yrs), .NET
AI / ML: LLM, TensorFlow Lite
Database: PostgreSQL (5 yrs), MongoDB (2 yrs), MySQL (1 yr)

Tools & Methodologies: Git (5 yrs), Docker (3 yrs), Agile (3 yrs), Scrum (1 yr), Waterfall (2 yrs)

PROJECTS

Punakawan — <i>Coding agent over Telegram</i>	Aug 2026
A single-file, standard-library Python bot turning a coding agent into a Telegram assistant — per-chat persistent sessions coherent across restarts, validated-copy deploys with automatic rollback, zero dependencies.	
Polyform UI — <i>Headless multi-language design system</i>	Jul 2026
51 accessible React and Flutter components sharing one logic core, swapping between 13 visual design languages through <code>---pf--*</code> design tokens. Installs shadcn-style via a CLI registry with zero runtime dependencies.	
Chatmunication — <i>Messaging & calling app</i>	Jul 2025
Flutter communication app with audio/video calls and messaging, powered by a Go (WebRTC) backend and PostgreSQL — exploring peer-to-peer media streaming and a floating, multitasking-friendly interface.	
Kilan Accurate — <i>Attendance monitoring system</i>	Jul 2025
Flutter mobile app for check-in/out and attendance history, paired with a ReactJS admin panel on NestJS and MongoDB for real-time monitoring, user management and reporting.	
Klontong — <i>Marketplace app</i>	Aug 2024
A Flutter marketplace app built to exercise crudcrud.com as a quick mock backend API.	
Emovied — <i>Movies & TV information app</i>	Apr 2023
Flutter app showing current movie screenings and TV broadcasts with plot summaries and cast details.	
Face Detection TFLite — <i>On-device ML in Flutter</i>	Jan 2022
Applied TensorFlow Lite in Flutter to run on-device machine learning in Android apps.	

ORGANIZATIONAL EXPERIENCE

Community Service Program, Kelurahan Tanjung Harapan — <i>Group Leader</i>	Dec 2022 — Feb 2023
Poltekba Technology & Developer Club — <i>Co-Founder</i>	Jan 2020 — Jan 2021
Student Executive Board — Student Union Poltekba — <i>Secretary, Student Resources Division</i>	Apr 2019 — Apr 2020
